Structure & Management

STRUCTURE AND MANAGEMENT

To be a prime, world class, and prestigious **INFRA/ Earth work, Civil & Construction Contracting Company**, whose clients are satisfied with the value we provide; with whom partners are pleased to be associated, and with whom employees are proud to belong. We add value to the lives of people, we share in the development of the countries where we work; each structure we build is a need answered, a desire fulfilled, a dream come true. We don't only look for opportunities; we create them. We draw the best from our people; we challenge them to realize their potential - what they have, what they can do, and what they can be - as individuals and as team members. We are a builder; we respect those we work for, those we work with, and those who work for us. Our Mission Statement is to provide excellent, world-class Project Management and Contracting services, which Delivers fully accomplished commitments to the satisfaction of our Clients, Ensure mutually beneficial ventures for our Owners, Partners and Suppliers, Foster rewarding efforts and career advancement to our Employees, Upholds people's safety, health and the environment; and Sustains challenging opportunities for growth within a framework of corporate stability and growth.

We set high standards in our performance we strive our best for the best, every time, everywhere. For us, nothing is unattainable when people work together in singleness of purpose. We see each other as team members, with abilities to share for the success of every project. Our expertise is seasoned by our ability to adapt to new technologies, as well as to re-invent our work systems to meet new challenges. The stability of our future largely depends on our ability to plan and focus on specific goals, and to communicate those goals from management down to each employee.

OBJECTIVES AND CHARACTERISTICS

We don't only **look** for opportunities; we **create** them..... before, during and after road construction. When we do our job, not only landscapes are changed, but lives are transformed, as well.

We draw the best from our people; we challenge them to realize their potentials – what they have, what they can do, and what they can be – as individuals and as team members.

We give birth to new leadership; when we set our objectives, strategies are developed, initiatives are taken, and characters are built.

We are a builder; we respect those we work for, those we work with, and those who work for us, because everything we strive for are first and foremost built on relationship and trust.

We are **AJMAN GENERAL TRADING & CONTRACTING - ATC** we understand that the strength of a building is measured by its foundation, that's why we took the wisdom of building our organization on the solidness and firmness of integrity.

MISSION STATEMENT

To provide excellent, world-class INFRA/Road cum Earth Work, General Trading and Road construction contracting company as mentioned below:

- ❖ Deliver fully accomplished commitments to the satisfaction of our Clients
- ❖ Ensure mutually beneficial ventures for our Owners, Partners and Suppliers.
- ❖ Foster rewarding efforts and career advancement for our Employees
- ❖ Upholds people's safety, health and the environment and sustains challenging opportunities for growth within a framework of corporate stability and growth.

Planning & Schedule

PLANNING & SCHEDULE

A project comprises of a series of phases and activities. A method to harness the entire effort, throughout various stages of project is called planning.

Planning is to define the activities involved in the project, establish logical sequence and inter-relationship between activities. Scheduling is to place the project activities on a working timetable.

Importance of Planning

Planning is essential to perform a function with minimum wastage of time and effort. Schedule is a phased plan used as guide to monitor performance and control pace of activities to ensure completion of project at required time.

A **COST PROJECT MANAGEMENT (CPM)** based schedule prepared at beginning of the project identifies activities critical for achieving timely project completion. This helps in concentrating efforts on issues critical to project completion from the beginning and provide opportunity to arrange for mobilization and demobilization of suitable manpower in a timely manner.

Periodic updating of CPM network-based schedule provides impact of delayed activities on project completion and on any milestone dates. Thus, provides management with an important tool for taking timely and calculated decisions about suitable corrective measures.

Proper planning and scheduling serve as basis for evaluation of progress and performance. It helps in effective utilization of resources.
