Chain Link Fence & Gates

Chainlink fence is the most common fence used for security purposes, the primary purpose of these fences are securing & enclosing areas like backyards, home lawns, children playing areas, government facilities and construction sites.

A chainlink fence is a woven type fence in a zigzag pattern. This pattern forms diamond shaped mesh with different sizes. These fences mostly made from Galvanized wire or PVC coated GI wire. Most of the businesses and homeowners prefer chain link fencing because it's very cost effective, durable and easy to install. These fences are also easy to maintain and repair.

						
GI	4.88 mm	4 mm	3.76 mm	3 mm	2.5 mm	2 mm
PVC	3.55/4.88 mm	3/4 mm	2.55/3.76 mm	2/3 mm		

				
75 mm	60 mm	50 mm	45 mm	25 mm
