Business Systems W.L.L.

# CORPORATE OVERVIEW

JAS Business Systems (A Division of JAS GROUP) is a leading Systems Integrator focusing on the design, deployment and maintenance of ICT and ELV solutions (IP based systems and network infrastructure). We take pride in being one of the fastest growing ELV & ICT Company in the State of Qatar having achieved remarkable growth in a short span and contributing significantly to the development of the State.

Established in 2006, JAS Business Systems is part of the JAS GROUP of Companies delivering technology contracting under many verticals including Supply and installation of IT Equipment's, Network Infrastructure, Structured cabling, Telephony services, Wireless services, Electrical Services, CCTV solutions, Access control systems, etc. This unique business model provides a highly technical and well-diversified installation force, which combined, enables us to handle larger and more complicated projects. Much of the labor force is cross-trained under multiple disciplines enabling labor to flow between projects to areas most needed at any given time.

We partner with the ICT Industry's leading manufacturers of proven technologies to deliver high-quality solutions to our clients. JAS Business Systems understands that Information Technology and Networking are critical to today's security infrastructure and we ensure our solutions incorporate today's standards.

Beyond its technology JAS Business Systems boasts the strongest team of project managers, technicians, and support personnel available in the industry and promotes an innovative and entrepreneurial culture within the organization. JAS Business Systems empowers our employees with decision making capabilities to ensure total customer satisfaction. We are committed to staying intimately in tune with our client's needs. Our strength lies not only in our ability to design and deploy customized, fully integrated solutions, but more importantly in our attention to the development of our relationships with our customer.

Our goal is to become an extension of our clients' team in order to seamlessly facilitate the completion of any project. In forming a partnership with our client, we gain a unique understanding of our client's specific requirements as they evolve, thereby enabling us to promptly evaluate and adjust existing solutions to meet the changing needs of our clientele.

## OUR VISION

"To be one of the most respected Systems Integrator of ELV and ICT solutions in Qatar and GCC"

In order to achieve our vision, our goals are:

- To continue to inspire confidence from our stakeholders by delivering successful and safe projects.
- To continue to provide and develop strong leadership with integrity.
- To constantly strive for continuity of works, taking pride in our aim of delivering all projects safely, on budget and ahead of program, ultimately exceeding client expectation.
- To respect the well-being of our workers and protect the environment, maintaining our 'zero harm' record.
- To recognize and encourage our employees, providing skills development opportunities to help them develop in their careers.

A black and white photograph showing the silhouettes of five business professionals in a meeting. They are gathered around a table, with one person standing and holding a document. The scene is backlit by a bright light source, creating a strong glow and highlighting the outlines of the people and the table. The background consists of vertical lines, possibly from a window or a wall.

# OUR MISSION

JAS Business Systems is involved in design, deployment and maintenance of ELV and ICT solution works for Commercial / Residential / Industrial Buildings, Hospitals, High Rise Towers, Site offices, Schools, etc.

The management of JAS is committed to provide customers with the best quality products and services in the above mentioned fields of operation. Our mission is to ensure total satisfaction of our customers through continual improvement of our services dedicated in achieving and maintaining excellence in all aspects of our activities. Thus, we recognize and accept the responsibility to:

Meet and exceed our clients' expectations the first time and every time. Control the hazards and risks posed by our activities and operations to our employees, clients, visitors and other third parties.

Add value for clients through innovation, foresight, integrity, and aggressive performance; and to serve with character and purpose that brings honor to God.

JAS emphasizes on Quality than Quantity as the main objective for all its endeavors and gained confidence in full trust in the ELV industry for its commitment, achievement with high degree of professional approach with quality requirements.

# SOLUTIONS

## ITS Infrastructure & Telecommunication Solutions.

JAS Business Systems provide professional and complete range of ITS Infrastructure & communication solutions to a variety of sectors. We design and implement the latest in Information & Communication Technologies. Our custom designs are tailored to suit your business and give you a competitive edge through value based solutions.

To deliver successful integration of complex systems requires both specialized skills and the right level of experience. Our team consists of highly certified professionals, many with over 10 years of experience in the IT industry.

Strong Communication and network foundation is the key to business agility and competitiveness in the technology-dependent Internet era.

## Structured Cabling Solutions (Copper & Fiber Optic Networks)

JAS Business Systems experts in providing well-designed, carefully implemented structured cabling systems that meet your data and communications needs. We specialized in the installation of copper network cabling to ensure long term performance, system integrity, and investment protection. JAS Business Systems' specialists are experienced in carrying out major Fiber Optic network installations with all the detailed planning and resource utilization required for such projects. Having successfully designed and implemented many structured cabling projects in Qatar, you can be assured that you would have a very reliable network infrastructure for years to come.

JAS Business Systems as a certified installer for many of the leading brands like Panduit, Coming, R&M, Nexans, 3M, etc., we can warranty the projects as per manufacture standards from 15 to 25 years.

We use calibrated and state of the art modern Cabling equipment's from leading manufactures like Fluke, EXFO, Fujikura, etc. We use our trained and certified technicians for splicing, terminations, cable laying etc.

Our installation teams are fully conversant and qualified with the latest installation practices and work to a quality-assured procedure ensuring all installations are carried out to a consistently high standard. Whether you need just one additional outlet or you require thousands installed, we have the knowledge, experience and expertise to ensure your installation is carried out to your specifications and with the same level of service and professionalism regardless of the size of the project or service call.

## Telephone block wiring

The telecommunications industry has become increasingly diverse with the types and number of services that are available, as well as the types and number of service providers. JAS Business Systems offer all kind of telephony services and we are the one stop place if you wish to change phones, add an extension, or install your own wiring system.

JAS undertakes Telephone block wiring as per iCT standards.

## Complete DATA center Infrastructure solution

IT operations are a crucial aspect of most organizational operations around the world. A data center is a facility used to house computer systems and associated components, such as telecommunications and storage systems. If a system becomes unavailable, company operations may be impaired or stopped completely. A data center must therefore keep high standards for assuring the integrity and functionality of its hosted computer environment. This is accomplished through redundancy of mechanical cooling and power systems serving the data center along with fiber optic cables, environmental controls (e.g., air conditioning, fire suppression) and various security devices.

JAS Business Systems provide consulting, planning and implementation of DATA centers of any size in different TIER levels. We design cooling / power requirements for DATA center which includes DATA center Precision A/Cs (Liebert), UPS systems ( Liebert, APC, Tripplite ), Remote monitoring systems (IMS 4000), FM200 Fire systems, Security (Access control and CCTV monitoring), Generator, and other design concerns of DATA center.

JAS specialized in the infrastructure installation of datacenter including raised/access flooring system, fire rated ceilings, fire rated doors, fire rated claddings, complete electrical, technology and mechanical installations.

## UPS Solution

A UPS is typically used to protect hardware such as computers, data centers, telecommunication equipment or other electrical equipment where an unexpected power disruption could cause injuries, fatalities, serious business disruption or data loss.

JAS Business Systems provide Supply and installation of variety of UPS models and sizes. We provide both single phase and 3 phase solutions. We are specialized in design of parallel redundancy solutions and other mission critical requirements.

As TRIPPLITE (a global manufacturer of power and connectivity solutions) premier partner with CAP certification; JAS provide all products and services offered by TRIPPLITE in the state of Qatar.

Some of other brands we deal with are Liebert, MGE/APC, Eaton, etc.

## PBX Systems

A private branch exchange (PBX) is a telephone exchange or switching system that serves a private organization and performs concentration of central office lines or trunks and provides intercommunication between a large number of telephone stations in the organization.

An IP PBX handles voice signals under Internet protocol, bringing benefits for computer telephony integration (CTI).

JAS Business Systems specialized in supply and installation of PBX systems from multi vendors. JAS provides IP telephony solutions of ALCATEL, HUAWIE, PANASONIC and AVAYA.

## Video/Voice Conferencing Solutions

Videoconferencing (VC) is the conduct of a videoconference by a set of telecommunication technologies which allow two or more locations to communicate by simultaneous two-way video and audio transmissions. With powerful computing processors and video compression techniques, videoconferencing has made significant inroads in business, education, medicine and media. By reducing the need to travel, without flying, driving or catching trains, to bring people together the technology also contributes to reductions in carbon emissions, thereby helping to reduce global warming.

JAS Business Systems provide POLYCOM video/audio conferencing solution.

## Access control, Time attendance and security systems

Physical access control is a matter of who, where, and when. An access control system determines who is allowed to enter or exit, where they are allowed to exit or enter, and when they are allowed to enter or exit.

JAS designs and implements different access control systems based on solutions from multiple vendors. These can include standalone card readers up to a complicated networked solutions consisting of tens of card and biometric readers, door controllers, turnstiles, road blockers and sensors. Whether your organization is large or small, the importance of managing access to your premises cannot be over-emphasized. Therefore at JAS we design our solutions based on the understanding that every organization or company operates differently, and each has individual needs and requirements.

A time and attendance system enables an employer to have full control of all employees working hours. It helps control labor costs by reducing over-payments, eliminating manual processes.

JAS provide time attendance systems from ACTATEK and other vendors.

## Public Addressing system (PA system)

A public address system is an electronic sound amplification and distribution system with microphone, amplifier, loudspeakers, mixing console, etc. PA systems with many speakers are widely used to make announcements in public, institutional and commercial buildings and locations.

JAS Business Systems provide Public addressing solutions from BOSCH Holland (Earlier Philips), TOA or PASO ITALY.

## CCTV and Security Surveillance

JAS has extensive experience in designing and installation of different CCTV security surveillance solutions. By carefully assessing our clients' requirements, we design, install and maintain cost-effective security systems which achieve and exceed our clients' expectations.

JAS has successfully implemented tens of large and small CCTV systems including analog and IP-based solutions from vendors such as Bosch, Axis, Dahua, Hik Vision, Samsung, etc.

## CATV and IPTV (Satellite Analog Cable TV & Satellite IPTV Solutions)

Cable television (CATV) is a system of delivering television programming to paying subscribers via radio frequency (RF) signals transmitted through coaxial cables or light pulses through fiber-optic cables and Internet Protocol television (IPTV) is a system through which television services are delivered using the Internet protocol suite over LAN or the Internet.

JAS provides turnkey, centralized, professional Satellite CATV and IPTV systems using top-of-the-line equipment from industry leading manufactures.

## Construction Time-lapse cameras

Time lapse construction camera lets you know what's happening on your jobsite 24/7, even when you're not there. It's easy to use because everything comes in one complete package. All you need is a device with Internet access, and you'll start doing things you never thought possible as Increase efficiency, Reduce travel costs, Improve communications, Enhance project management, Increase client transparency, Provide a firewall against warranty claims, insurance issues and contract disputes, Produce time-lapse movies for marketing and public relations.

JAS Business Systems provide Time lapse solution on permanent or rental basis from OxBlue.

## Electrical Wiring

JAS Business Systems provide Electrical wiring, Glanding and termination of Electrical cable, Panels, DBs and sockets. We are specialized in designing and installation of electrical requirements for Small wiring closets to Big DATA centers.

## Fire Alarm and PAGA Solutions

Fire Alarm solutions are a key element in any safe facility. JAS designs, procures, installs and maintains fire alarm solutions that would fully match your business requirements through our sister concern.

## ERP (Enterprise resource planning) Software & Solution

ERP provides an integrated view of core business processes, often in real-time, using common databases maintained by a database management system. ERP systems track business resources and the status of business commitments. ERP facilitates information flow between all business functions, and manages connections to outside stakeholders.

JAS partner with RAMCO (One of the leading software products and services provider incorporated in India). RAMCO Systems is a provider of ERP, Human Capital Management and Aviation Maintenance & Engineering (M&E) & Maintenance Repair & Overhaul (MRO) Software.

## Software development

JAS partner with specialized companies for proprietary software development. Software can be developed to meet specific needs of a specific client/business, to meet a perceived need of some set of potential users, or for personal use.

JAS provide Custom software programming, on all major software platforms including the latest Microsoft .Net, ORACLE, etc.

## Extended warranty, Service and Ongoing Maintenance Agreements

An extended warranty is coverage for electrical or mechanical breakdown. It may or may not cover peripheral items, wear and tear, damage by computer viruses, normal maintenance, accidental damage, or any consequential loss. The indemnity is to cover the cost of repair and may include replacement if deemed uneconomic to repair.

JAS business systems provide extended warranty support and ongoing service and maintenance contracts as per client's requirements.

JAS Provides different service plans (Basic, Advances and Plus) considering the client's support demands which include 24/7 support within 4 hours response time. We can tailor maintenance options to fit your requirements for all infrastructure products and services.

We offer a wide variety of options designed to help keep your infrastructure up and running.

## Help Desk, Technical support & outsourcing services

JAS; a help desk provider intended to provide the customer with information and support related to the client's requirements. We troubleshoot problems or provide guidance about daily infrastructure problems such as network administration, component installation, configuration, system imaging, and advanced configuration of computers, electronic equipment, or software.

JAS Provide outsourcing services for reducing cost and improving quality for our clients. By outsourcing to us; we help our clients to perform well on their core competencies, from which cost is reduced and products stay in high quality. We help to mitigate shortage of skill or expertise in the areas where they want to outsource.

## Technology Equipment Rental

As businesses around the world scramble to keep up with the latest technology, JAS provide technology equipment rental for short term or long term period to organizations nationwide.

Whether you are presenting at an exhibition, or attending a conference, JAS can ensure that your business looks and operates at its fullest potential. We offer a variety of rental solutions by the day, week or month to meet your unique equipment rental requirements. Our technology experts understand all types of business segments; from Corporate and Professional Services, to Events and Training, Government, Education, Banking and much more.

# PRODUCTS

## Networking Products (Active)

We Provide Complete networking hardware including LAN/WAN products, ISDN, ADSL, VPN, Switches, Routers, Firewall, Wireless and Network gateways. We partner with major brands like CISCO, HP, and Linksys.

We provide complete firewall solutions from Fortinet, Cyberoam and Sonicwall. Our product range includes industrial switches and media converters from AMG and allied Telesis.

## Networking Products(Passive)

JAS business systems having alliance with most of the leading manufacturer of passive networking items. We are certified with Panduit, Nexans, R&M, coming, 3M, Systemax, etc. We can supply any kind of passive cabling products from leading manufactures.

We are authorized distributor for TOTEN Racks and cabinets in the state of Qatar. We keep stock of all range of products from TOTEN.

## Computer Hardware, Software and peripherals.

Computers, Servers, Storage, Printers, Scanners: JAS business systems provide sales and support of Computer hardware from multiple corporate vendors - DELL, HP, Lenovo, etc.

JAS business systems specialized in providing design and configurations of Servers (DELL, HP, and IBM) as per client's requirements. We supply Printers, Scanners, Projectors and all other IT equipment hardware as per client request.

Computer data storage is a technology consisting of computer components and recording media used to retain digital data. It is a core function and fundamental component of computers. JAS provide storage solutions (SAN, NAS, etc.) from NetApp, Buffalo, HP and IBM.

Scanners optically scan images, printed text, handwriting, or an object, and converts it to a digital image. JAS having alliance with major scanner manufactures like FUJITSU, KODAK, HP, etc.

## Software licensing:

A software license is a legal instrument governing the use or redistribution of software. Software license grants an end-user permission to use one or more copies of software in ways where such a use would otherwise potentially constitute copyright infringement of the software owner's exclusive rights under copyright law.

JAS specialized in providing Software licensing from Microsoft, Autodesk, Primavera, Adobe, Symantec, Nitro, Oracle, WinZip, etc.

## Antivirus Licenses:

Antivirus software detects and removes computer viruses, malware, and provides protection from other computer threats such as infected and malicious URLs, spam, scam and phishing attacks, online identity (privacy), online banking attacks, social engineering techniques, Advanced Persistent Threat (APT), botnets DDoS attacks.

JAS Business Systems provide Antivirus solutions from major vendors like Kaspersky, McAfee, ESET NOD32, Trend Micro and Symantec.

## Consumables and accessories:

Consumables are products that consumers use recurrently, such products as paper, pens, file folders, post-it notes, computer disks, and toner or ink cartridges. A peripheral device is generally defined as any auxiliary device such as a computer mouse, keyboard, image scanners, tape drives, microphones, loudspeakers, webcams, and digital cameras.

JAS Business Systems provide supply of Computer accessories and consumables of all brands.

## Supply of office automation equipment's

Office automation helps in optimizing or automating existing office procedures like transfer data, mail and even voice across the network. All office functions, including dictation, typing, filing, copying, fax, Telex, microfilm and records management, telephone and telephone switchboard operations, fall into this category.

We provide Supply and installation of photocopier, fax machines from XEROX, KONICA MINOLTA, BROTHER, HP and many other leading brands.

## STRATEGIC ALLIANCES

## PARTNERSHIP FOR QUALITY

Working together to create value for our customers – that's the fundamental aim of JAS Business Systems.

With our existing network of high-quality partners, we provide full-service support to our mutual customers as they optimize their IT processes. Together, we deliver professional business services and focused IT that maximizes business performance.

We value the opportunity to serve you and are committed to assist you for your technology demands. We are constantly seeking to improve the services we provide. Our experienced and responsive staff, along with constant innovations in technology, plan, design, and state-of-the-art reporting, ensures that our clients will be more satisfied.

Thanking you and looking forward to be of service.
