New Orbit Group of Companies

2010

The story begins with the establishment of our parent company, New Orbit Trading, in 2010 as a wholesale trader of sanitary wares and perfumes.

2016

As part of the diversification strategy, New Orbit Tech Trading & Contracting was established in 2016 as a specialist HVAC contractor. Over the years, we have grown to be a reputed MEP contractor.

2017

Fireman Safety Services, a specialist Qatar Civil
Defence approved contracting company focusing
on Fire Fighting and Fire Alarm systems, entered
the fold of the group in 2017.

2018

In 2018, we also forayed into the F&B sector with the establishment of The Tea Junction Cafe and Restaurant.

2021

Recognizing the increasing significance of service sector in the national economy, New Orbit Facilities Management was established in 2021. Beginning with soft services, this company aims to provide end to end Facility Management services

Chairman's Message

66

We exist not just to generate profits. We exist to meet a need in the society and meet that need in a way provides a pleasant experience to all involved, adds value and builds longstanding relationships. In the process, we also generate profits.

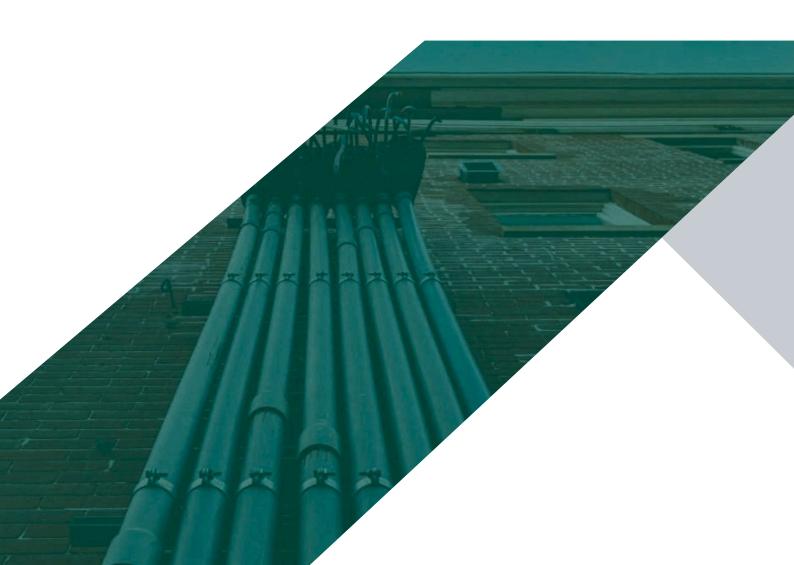

- SALEM MUBARAK AL HAJRI

Our Mission

NOTTC aims to contribute positively to the society by providing varied services with a high standard for quality, customer service, reliability and innovation.

Our Vision

To be an organization that can be referred to as a benchmark in Qatar in the quality of services provided and in promoting a great workplace culture.

Contracting

NOTTC undertakes MEP projects as a whole as well as individual streams like HVAC, Fire Fighting and Fire Alarm, Electrical, Plumbing and Drainage and Low Voltage systems.

To elaborate, the we undertake contracting works in the following areas.

MEP Projects

Total MEP works, mainly for Fit Out projects. We have successfully completed several fit out projects as an MEP contractor.

ACMV

NOTTC started out as an ACMV contractor and ACMV is one of our core strengths.

DX SYSTEMS

Supply and Installation of

- Packaged Units
- Computer Room Air Conditioners (CRAC)/ Precision AC units
- Fresh Air Handling Units
- Cold Rooms
- Domestic Water Tank Cooling
- Ducted Split Units
- Floor Standing, Cassette AC Units.

Chilled Water Systems

Supply and Installation of

- Chillers
- Air Handling Units
- Energy Recovery Units
- Fan Coil Units

Mechanical Ventilation

Supply and Installation of Ventilation systems for

- Car Parks (Jet Fans/Ducted Systems)
- Warehouses
- Kitchens (Fresh Air, Exhaust and Ecology Units)
- Staircase & Lobbies
- Toilets and Pantries

Brands we deal with

FIREFIGHTING AND FIRE ALARM

Supply and Installation of

- · Fire Fighting systems
- Fire Alarm Systems
- · Wet Chemical Suppression systems
- FM 200 systems

ELECTRICAL

Supply and Installation of

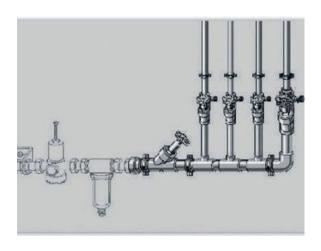

- · Small power
- Data and Telephone
- CCTV
- Access ControL

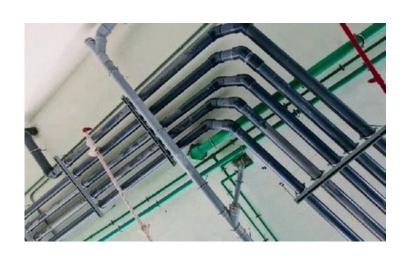

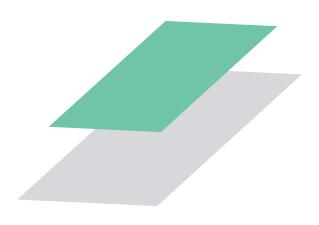

Plumbing & Drainage

Supply and Installation of

- PPR pipe networks
- Copper pipe networks
- · SS pipe systems
- UPVC pipe systems
- HDPE pipe systems

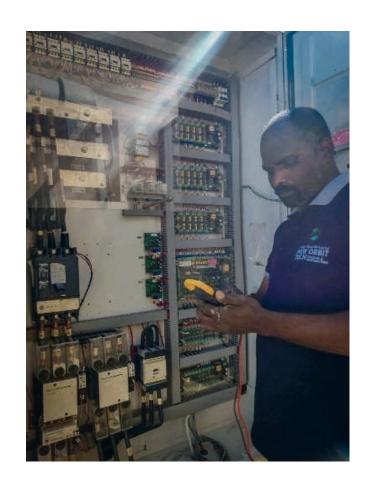

MAINTENANCE

We undertake preventive and corrective maintenance of MEP systems.

Our customized maintenance plans can ensure that your systems operate at optimum levels granting you peace of mind and savings on your time and money that would otherwise be casued by system downtime.

We study your systems and provide recommendations and if need be, impart training for the its upkeep.

SPECIALIZED SERVICES

Air Quality Services

Air is the most important thing that we consume. Its much more important than food and water. We consume air every minute of our existence. Yet, most people are concerned about the quality of their food and water but no so much about the quality of the air that they consume from the moment they are born and throughout their lives.

Air Quality is an often neglected but important parameter that affects the health of the occupants. Poor air quality can cause issues ranging from mood swings to respiratory disorders and can impact the overall quality of life.

We inspect the air distribution systems for factors that affect air quality. Then the best possible remedial measures are adopted to improve the air quality.

Today most of the air conditioned spaces are completely isolated from the atmosphere. This can cause the buildup of CO2 and stale air. Its important to replace the air in the room a certain number of times every hour to maintain

freshness depending on the space and the activity happening within It. For example, a gym would need more fresh air compared to a library. However, bringing in outside fresh air which is hot and humid is also creates and additional load on the air conditioning system. Here we propose energy recovery units that bring in fresh air at a reduced load.

Air Filtration

Maintaining air quality starts with air filtration. We supply and install a wide range of air filters ranging from pre filters to HEPA filters.

Odour Control

We suppply and install ozone generators that are very effective in controlling odour like that of cigarette smoke, meat, fish, toilets etc. The ozone generators causes oxidation of the odour molecules thereby altering its composition resulting in odour neutralization.

Air Sanitization

We supply and install air sanitization devices that can eliminate most of the microbes and allergens in the air. The negative ions attach themselves to organic molecules and are then trapped in the device when it passes over the positively charged plate.

Smoke Filtration systems

These systems are an inexpensive way of cleaning the air in a closed place without bringing in fresh air or exhausting air. Smoking areas and shisha lounges can make use of these systems to maintain a comfortable atmosphere.

Duct Cleaning

AC Duct Cleaning

Air Conditioning ducts often have remnants of construction waste, bird and rodent droppings, dead insects and if moisture is present, mold and fungus too. Hence its important to inspect the system and perform cleaning atleast once in 2 years.

Before

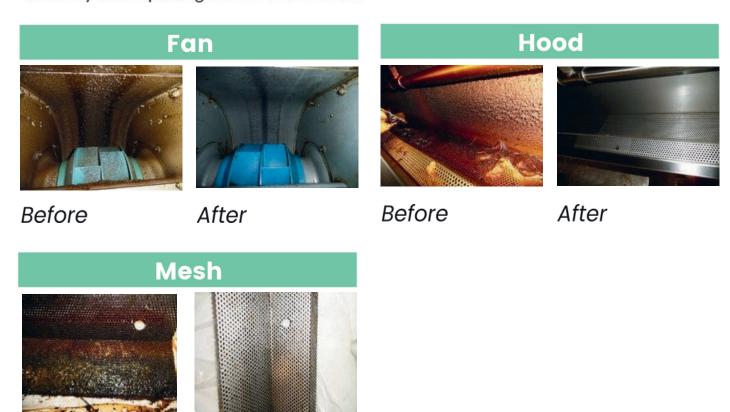

After

Before

After

Kitchen Duct Cleaning

Kitchen Exhaust duct cleaning is very important from a safety point of view and efficiency point of view. The grease and oil that accumulates in kitchen exhaust ducts are a potential source of fire hazard. It can also clog the motor of the exhaust fan resulting in poor efficiency and impacting the life of the motor.

Air Balancing

After

Before

Air Balancing is an aspect that is very often neglected in some projects. An unbalanced air distribution system can cause uneven cooling, wind noise, pressure imbalance between rooms and uncomfortable drafts. Often times, modifications are done on the system which causes an imbalance in the air distribution. Our air balancing services can ensure that the system is optimally balanced and gives you the best experience.

PROFILE

I am a highly skilled HVAC Engineer with over 7 years of experience specializing in the design, installation, and maintenance of advanced HVAC systems for commercial, residential, and industrial applications. Proficient in applying ASHRAE and SMACNA standards to ensure high performance, energy efficiency, and compliance with industry regulations. My background includes extensive expertise in project management, system design, and energy-efficient solutions. I have a proven track record of delivering complex projects on time and within budget while achieving high levels of client satisfaction. I am passionate about leveraging cutting-edge technology and innovative practices to enhance system performance and sustainability
