Quality Policy

The most important factor in producing a quality product or service is the attitude of the people doing the work. At Prosafe group Quality attitude is institutionalized at all levels of the management. Quality control checks are carried out during raw material sourcing, during production and before finished goods movement to warehouse. Our supply and services are delivered after thorough understanding of customer requirements that include product specification, documentation, packing and delivery.

Industrial Work Wear MANUFACTURING

We design and manufacture Protective Clothing. We are authorized by Dupont and have license to manufacture **Nomex Garments in GCC**.

We also manufacture other FR garments like **Marlan, Protera** Depending upon your protection requirement we have the expertise to design and develop protective coveralls for both hazardous applications and non-hazardous applications.

We offer a wide range of Flame - Resistant garments designed to address the hazardous conditions.

For the past 10 years we have developed over 60 different models of CAT I, CAT II and CAT III Protective Clothing. Our CAT III FR garments are EN certified and THERMO-MAN tested.

We have production units both in Qatar & UAE. Our production units are supported with our own warehouses. Our current production capacity is 200,000 pieces per year and we have enough space to double this capacity.

Textile Management Solution

Prosafe Group has a full-fledged Industrial Laundry that offers complete Textile Management Solution for the customers. In this service we supply, clean, repair and maintain the industrial work wears (Coveralls/Uniforms) for our customers.

Our Textile Management includes the following Industrial Laundry Programs

- 🌐 Work wear Leasing with "Industrial Laundry Program"
- 🌐 Industrial Laundry Program for "Customer Owned Garments (COG)"

Work Wear Leasing- Industrial Laundry Program

In this program we:

- 🌐 Supply of Suitable Work Wear & personalizing the garment with RFID/barcode tags and put them into circulation
- 🌐 Collection, Cleaning, Repairing & Depositing fully functional Garment into respective Lockers on an agreed frequency

Benefits

- No Capital Expenditure towards Purchase of Garments
- No tedious Tendering Process on Supply of Garments, Inventory Management & Issuing Garments to end users
- Weekly Leasing fees paid with Flexible credit payment terms
- Peace of Mind in receiving a fully Functional Clean Garment every day (Upholding Safety Objective of the Client)

Customer Owned Garments- Industrial Laundry Program

In this Program We:

- Facilitate the Service provider to Personalize the Garment with RFID/barcode/tags and put the Garment into circulation.
- We providing Cleaning, Maintenance & Repair Services to an agreed period of time

Benefits

- Extending the Service Life of the Garments due to appropriate Cleaning and Repairing bringing cost saving to the client
- Controlled Issue of Garments with Traceability
- Cost Saving in the budget of FR Garment Purchase due to appropriate Cleaning and Repairing of Garments
- Peace of Mind in receiving a fully Functional Clean Garment every day (Upholding Safety Objective of the Client)
